

Ultimately, Ron Clark neighborhoods become prime assets.

You can feel it when you walk the pleasingly laid-out streets and creatively landscaped greenways that are trademarks of our neighborhoods. There's a genuine pride of place. A real joy that comes from living in homes where every detail has been thoughtfully planned and skillfully executed. Just a few of our recent addresses where we've been both developer and builder include: Waycliffe townhomes in Wayzata; Grandview Square condominiums in Edina; Ridgebury and Willoughby townhomes near Ridgedale shopping center in Minnetonka; Nine Mile Cove detached villa homes in Hopkins; and Clarion Hills single-family homes in Minnetonka.

How may Ron Clark Construction & Design work with you to create a new neighborhood? We're dedicated to innovative solutions that will be home to generations of families. Please contact us for more information.

*Both a developer and a builder,
we assure a cohesive vision.*

Ron Clark Construction & Design is that rare combination of vision and detailed craftsmanship. Which makes working with us quite a breath of fresh air. The visionary side of us excels at developing a comprehensive plan that will transform raw land into attractive, enduring neighborhoods. While the builder side of us is obsessed with perfection, ready to craft the comfortable, sophisticated housing today's homebuyers demand. As a result, we understand the goals for a project from beginning to end, making the entire process flow more smoothly. Because we're local, all the decisions are made right here. And we'll be on-site steering the course for the impressive outcome we all envision.

*The Ron Clark philosophy:
Deliver all that we promise.
And more than anyone expects.*

*Our diverse experience opens a multitude
of options for you.*

Because cookie-cutter building is not our style, we pride ourselves on having the ability to design solutions that speak to unique needs. Our portfolio includes the development, design and construction of entry-level townhomes, luxury villa townhomes, condominiums and multi-million dollar single-family homes. We work hand-in-hand with municipalities to analyze sites being considered for development or redevelopment. And we assist them in determining the housing types that can best serve the site and the market of potential home buyers, while also enhancing the neighborhood.

Thirty years of success provide a rock-solid foundation.

Throughout nearly 30 years, we've been honored with the esteem of our peers and clients. And rewarded with the confidence of long-time relationships in the finance industry, as well as employees and associates. While the first statement speaks volumes for the homes we produce, the second is a testament to our business savvy and stability. Many subcontractors have been with us for over 25 years. And our in-house team of more than 40 specialists displays an exceptionally high level of loyalty in an industry known largely for high turnover. In short, Ron Clark Construction & Design is a company of people you can depend on to consistently meet, and reach beyond, the highest of standards.

We're richly rewarded with respect and confidence.

We have been honored with: the HAP (Home Builders and Associates in Partnership) Award, given to one builder annually by the Builder Association of the Twin Cities; People's Choice Award; Bennie Award for Best Association Maintained Neighborhood; numerous Reggie and Trillium Awards.
